

## You've embraced the need for shop management.

Now don't accept anything less than the best.

As a business owner or manager, you know that it's more important than ever to work efficiently and effectively to remain profitable. But did you know that there may be wasted time and effort in your shop that may be costing you money and negatively affecting your profitability?

That's why we've introduced you to **StockTrac® Enterprise** Shop Management. It's the most complete, most customizable, most time tested solution available for managing an automotive repair shop in today's competitive environment.

We believe that a one-size fits all solution does not meet the needs of today's automotive shop. At the same time, a software solution should be affordable and offer immediate ROI. Enterprise meets and exceeds these criteria by offering you the ability to build your solution with the help of our expert staff, at a reasonable price.

With Enterprise, you'll have all the tools you need to streamline your business and the backing and support to implement them. You'll boost your overall effectiveness and efficiency with a few of the tools included with Enterprise

- Quick and easy invoicing/estimating with direct access to part and labor guides.
- Integrations with more third-party applications, e.g. Activant, AconneX, Wrenchhead Nexpart, NAPA, CarQuest, Autozone, Mitchell, than any other Shop Management System.
- Automatic transfer of daily sales into your QuickBooks® accounting package.
- A full customer data management/marketing module built into the program.
- Inventory management/control that gives you strict control over stocking and ordering.
- Margin control meters that give instant visual feedback for parts, jobs, and total tickets.
- *Absolutely* the best customer support you will ever receive.

Customer support is our company's top priority and named by our current customers as the "Legendary Technical Support". Janco has an industry-wide reputation for unparalleled customer service. Ninety-eight percent of all technical support questions are solved at the time of the call. Janco always goes that extra mile to insure complete customer satisfaction.
